

G 30

Roller shutter made of galvanized steel

with hollow and reinforced 80mm wide profile.

Offers great security with noise-free operation and aesthetics.

Ideal for residential use, retail stores and industrial use.

Suitable for openings with height limitations

as this profile requires smaller coil space.

Type G30 is delivered electrostatically painted

in the shades of the main color index.

PROFILE:
GALVANIZED
STEEL

DIMENSION:
80 mm

THICKNESS:
0,6mm / 0,8mm / 1mm

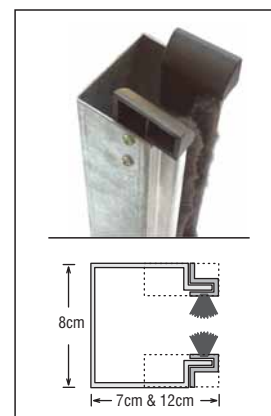

(a) (b)

An elastomer
PVC strip is
attached to
the aluminum (a)
or steel (b)
last profile (endplate)
for enhanced sealing.

Special
polyamide cap
at profile ends
that reduces
friction and noise.

Guide made of
1,5 - 2mm thick,
"Q" shaped
galvanized steel
that works together
with a special
aluminum profile
and brush strip
to reduce friction
and noise.
